

Instructions for building pet enclosures

The resident must request a permit from the office of Inarin Vuokra-asunnot Oy for building a pet enclosure or kennel on their backyard. Permits are processed on a case-by-case basis. The boundaries of the plot must be surveyed before any building work is started. The permit only applies to the plot of Inarin Vuokra-asunnot Oy. The instructions also apply to cable leads and similar equipment.

Any structures must be built in such a way that they can be removed when necessary. The landlord recommends using prefabricated elements with stones or yard tiles placed underneath the enclosure, as this makes the enclosure easier to take down. The enclosures must be built and taken down at the tenant's expense. After the enclosure has been taken down, the work must be approved by the representative of Inarin Vuokra-asunnot Oy.

The pet's droppings must be cleaned daily to avoid any smells.

The housing company's rules have the following provisions on pets:

Pets must be kept on a leash when taken outside the apartment. Pets must not cause a disturbance to other residents or people moving about in the building or make the building or its lot dirty. Pets are not allowed in areas reserved for children's play or their immediate vicinity.
